

Result

Congratulations, you've completed Instinctual variant test

Based on your answers, you can see your result below

60%

Social (so)

Your dominant instinctual variant is likely social. The so instinct searches for community and belonging in the greater world. An so-dominant fears loneliness, alienation, or inferiority. They may be personable, cooperative, or superficial. They feel that they need a sense of belonging in order to get along in life.

27%

Self-preservation (sp)

Your dominant instinctual variant is likely self-preservation. The sp instinct searches for survival, and is focused on itself and its world. An sp-dominant person fears not surviving, and may be fearful of poverty, annihilation, or mortality. They're usually grounded, serious, and stable. They may feel that they must make it on their own in order to survive.

13%

Sexual (sx)

Your dominant instinctual variant is likely sexual. The sx instinct searches for intimacy, and is focused on intense connections. An sx-dominant fears incompleteness, loss of connection, or lack of desirability. They may be intense, playful, or impulsive. They feel that they need a strong bond or "other half" in order to get along in life. The sx instinct should not be confused with the physical act of sex or sexual desire itself.
